IT Professional Services

Our IT team is passionate about building your trust and making your technology concerns easy and simple.

With multiple levels of expertise, we have the capacity to provide all of your specific computing, network and hosting needs.

With courtesy and confidence, we provide remote and on-site problem solving support.

Regardless if we are pulling wire for infrastructure, designing a system, resolving network conflicts, or simply providing helpdesk support, we have one focus in mind: building your trust by delivering solutions regardless of the type or size.

Managed Services Provider

Why wait until something is broken to fix it? A Managed Service Provider offers a proactive approach to managing your computer system. Through regular monitoring we provide:

1. Anti-Virus updates
2. One source patch updates for OS and third party programs
3. Optimizing performance and clean up
4. System monitoring for early identification of problems and appropriate resolution responses

ZBx Technology

Web Design Services

How up to date is your website? Is it optimized for mobile devices? Does it follow the "F" pattern for optimal viewing potential?

The web design team knows how to customize your website for maximum viewer impact. Creating and managing a website is far more complex than putting up a digital billboard for customers to see. In order for your website to have the best viewing potential with the best outcome, the technical, artistic and functional elements need to be interwoven to attract viewers and make their experience with your website easy, informative, and impactful.

Hosting Services

We are a reliable, supportive, and cost-effective provider for all your hosting needs—web, applications, email and the cloud. We are a consultative resource to help guide you in making the best decisions for your host requirements.

Computer Repair & Clean-up

We provide honest and trustworthy computer repair and cleanup. Regardless of what it is—residential or business, we will assess the status and repair what is needed or make recommendations on replacement.

How it all started

In 2003, Zach Nordhof started a small business out of the necessity to help people with their personal computers. Word of mouth spread and soon he had a flourishing business and solid reputation providing a great service for a fair price. While he was advancing his professional career in the corporate IT world, Zach recognized the need to provide customized service and solutions to meet the customer's specific wants and needs.

Today the ZBx Technology philosophy remains unchanged—treat customers with respect, listen to their needs, and provide great service for a fair price.

Why choose ZBx Technology?

Our philosophy is simple! We treat each customer with the utmost respect and make recommendations based on what is in your best interest—not ours. Our goal is to make your life as easy and pain-free as possible. You are busy managing the day-to-day aspects of your business or organization. Let the technical professionals at ZBx Technology help you focus on what is important.
